

MADE IN THE USA

Celebrate the 4th of July with products made in the USA. The world may be getting smaller, but our patriotism stills shows each summer on Independence Day. Have you noticed the thrill you get when you see the Blue Angels soaring through the skies at an air show? Or the lump in your throat when an American athlete stands on that top podium for a gold medal, listening to the national anthem? How about the sense of belonging to something special while singing God Bless America with your son or daughter at a major league baseball game? When you consider what you can do for your family, neighbors, friends and clients...think American Made for this summer's promotions, events and celebrations.

Sincerely,
